

➤ LONG TERM STORAGE CONTAINER

TBDUK design, type test and manufacture a wide range of purpose specified and customised specialist tooling, transportation and storage equipment for the handling, protection and safe transportation of high value loads by land sea and air.

Transportation and storage stands to provide appropriate support and protection for loads such as jet engines, aircraft wings, fuselage sections and other high value components during road sea and air transportation.

Environmental air portable storage containers providing safe long term storage for critical component in a controlled atmosphere. These containers can include power operation of the covers, in built automatic dehumidification systems and provision for rotation or in storage maintenance with opening the container and breaching the protected environment.

Each solution will be tailored specifically to the application and can be produced as a one off or in quantity as appropriate.

- ▶ Configured to provide optimum solution to your storage / transportation requirement
- ▶ Type tested to provide guaranteed protection
- ▶ Robust yet easily manoeuvrable and air portable when required
- ▶ Designed for maximum practicable stability, safety and ease of use
- ▶ Compliant to the relevant British Standards, HSE Codes of practice/guidelines and relevant IATA and industry standards
- ▶ Wide range of interface options, materials and protection systems available
- ▶ Designed for durability and very low maintenance

> OPTIONS / EXTRAS

- ▶ Aircraft type - Single aircraft or multi-aircraft / part
- ▶ Stand support method - Floor mounted on castors/ fixed frame /suspended
- ▶ Manoeuvring - Manual/ tow bars for tugs/ self powered
- ▶ Height - Fixed or variable- Method of adjustment if variable- manual/electrical/ hydraulic/pneumatic
- ▶ Type of work to be undertaken on component when in the stand - system to suit different maintenance tasks
- ▶ Stabiliser jacks - Wind down / quick release kick down / powered
- ▶ Material - Steel / aluminium
- ▶ Finish - Painted / galvanised
- ▶ Method of attachment of part to stand / protection & buffering of component to stand
- ▶ Level of environmental protection required
