

Engineered in Britain.
Trusted worldwide.

Customer Service Engineer

Reporting to: Sales Director

The ideal candidate will have experience working with general plant and machinery, ground support or material handling equipment with a mechanical/electrical/hydraulic focus. The Customer Services Engineer will provide our network of aerospace customers with a professional on-site presence with responsibilities that include:

- Ensuring smooth delivery and commissioning of equipment
- Provide on-site inspection and planned preventative maintenance
- Conduct training for users and equipment maintainers
- Warranty fault finding, repair and reporting

The role will require travel, working independently and as part of a team alongside our customer service and engineering department. Whilst this role requires a high level of technical ability a customer-focused attitude will be an essential characteristic.

Company Benefits

- £35,000 per annum
- Healthcare benefits package
